

Customers, Suppliers Orders, Products

Data Management and Business Performance Management

Prof. Dr. Ingo Claßen

Hochschule für Technik und Wirtschaft Berlin

Description

- ▶ Products have a product number and a description.
- ▶ Customers have a customer number and a name.
- ▶ Suppliers have a supplier number and a name.
- ▶ Customer place orders, each which consists of header information and of a list of order items. The latter have a reference to the corresponding product as well as quantity information.
- ▶ Customers are divided into different categories.
- ▶ Each product can have many terms of supply stating price and delivery period. These terms depend on the supplier.
- ▶ Customer prices depend on customer categories.

Solution
